

Experience Contrast-Enhanced Mammography MEDRAD® Stellant FLEX Injection System

Contrast-Enhanced Mammography is a valuable clinical tool in the diagnosis and staging of primary breast cancer.

MEDRAD® Stellant FLEX
CT Injection System

MEDRAD® Stellant FLEX CT Injection System with Certegra® Workstation is the first and only CT injection system currently 510(k) cleared for use with Contrast-Enhanced Mammography.

Contrast-Enhanced Mammography (CEM) can allow for better visualization of abnormalities in breast tissue that may not be visible with conventional mammography¹. Using Stellant FLEX in CEM procedures offers benefits by supporting:

- Consistent delivery of contrast for enhanced visualization of lesions
- Easy and automated set-up features and quick visual indicators to allow focus on patient care
- Customized protocols which can be created and stored to meet departmental needs
- Small footprint and flexible movement for different room configurations, well-suited for mammography suites*

Simplify Contrast Administration in Your Acquisition Workflow

Our reliable implementation and support teams offer customized service solution options based on the unique needs of your department with an emphasis on adding value for the lifetime of your equipment – every step of the way.
